

When you inherited Stan L.'s peculiar farm, you expected the usual rural challenges. Instead, you got talking ninja chickens with attitude problems, sumo pigs who meditate at dawn, and a battle against corporate America that would make anyone jealous!

By day, plant your crops, buy your first tractor, upgrade your facilities, and master the art of organic farming with a radioactive twist. Build relationships with your eccentric animal companions, each bringing their own martial arts expertise and dubious farming advice to the table. Navigate the complexities of rural life, from sweet-talking overzealous tax inspectors to bartering with the peculiar locals who seem suspiciously comfortable with your farm's glowing produce.

But when night falls, things take an unexpected turn: switch to a third person shooter and defend your land against the policemen sent by Doug McMillion, the fearsome CEO of Mallwart, who wants to turn your farm into a shopping mall. To do so, use your special crops as weapons, creating a watermelon bazooka or a banana katana, create as many wicked weapons as you can imagine! Or maybe you could give some of your premium produces to the local crop mafia, the "Silo Syndicate", to protect you?

In this game that humorously blends peaceful farming simulation with crazy & radioactive combat, choose your strategy but don't think too hard.

As your farm flourishes and your reputation grows, so do the threats. Each victory against the underlings brings you closer to the ultimate showdown with McMillion himself, who's traded his business suit for a state-of-the-art nanosuit that would make any tech startup jealous.

Take on this totally original agricultural adventure solo, or team up with your faithful friend Bob in seamless co-op play. Whether you're orchestrating elaborate defensive strategies or engaging in intense fights, remember, in WarFarm, today's harvest could be tomorrow's victory recipe.
